

# New toll road system in Slovenia

As of 1 April 2018, Slovenia will introduce a modern, free-flow electronic tolling system on motorways and expressways for vehicles with the maximum permissible weight over 3.5 tonnes (heavy vehicles). When a heavy vehicle passes a toll gantry, the latter will detect the DarsGo unit in the vehicle using microwave technology, which will provide the basis for charging toll for a particular tolling section.

**E100**

Why you need to register in Dars Go system with E100?

# Why you need to register in DarsGo system with E100?

## E100 provides full registration process and it free for clients.

For all transactions related to the DarsGo system, customers receive one invoice from E100 – it's useful and practical.

### To register with E100, you need:

- 1) Fill in registration form of E100 providing all necessary company's information and documents, prepare a vehicle technical passport and confirmation of the emission class EURO.
- 2) Obtain the registration confirmation from E100.
- 3) With this document you will need to go to service point and claim the OBU paying administrative fee with E100 card and making top-up or assigning for postpay.

No need to pay on each toll station!

All calculations and payment are automatic – just choose a convenient the payment mode:

**PRE-PAID:** a deposit at a «DarsGo servis» with E100 fuel card.

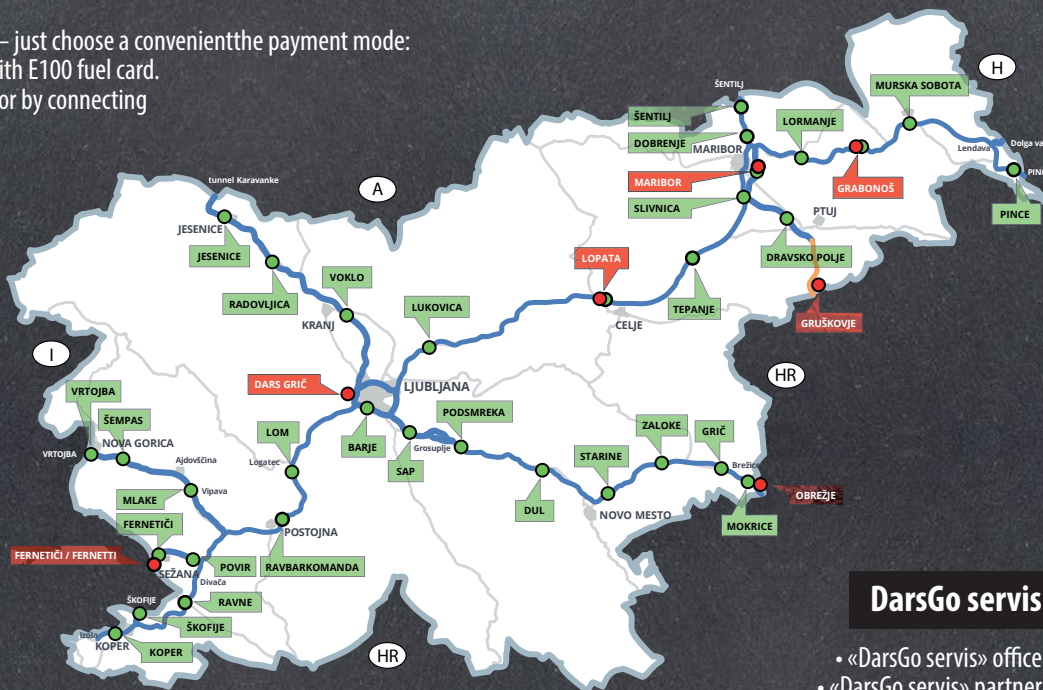

**POST-PAID:** based on a contract with E100 or by connecting the vehicle account with E100 fuel card.

### What a toll payment depends on?

- EURO emission class
- The number of vehicle axles
- Mileage of the toll road section

### DarsGo Unit – payments:

- The administrative fee upon the initial registration and when claiming the DarsGo unit is EUR 10, can be paid by E100 card.
- If the unit is lost, destroyed or stolen, you will have to pay the administrative fee of EUR 20 for a new unit and for every new unit after that.
